

# The Immeasurable Costs of U.S. Nuclear Weapons

A nuclear briefing and roundtable  
discussion with

**Marylia Kelley**

from Livermore, CA

Friday, August 21 at 7 pm

San Jose Peace & Justice Center,  
48 South 7<sup>th</sup> St., S.J.95112

Free event

*Sponsored by Women's International  
League for Peace & Freedom*

Marylia Kelley is Executive Director at **Tri-Valley CAREs** (Communities Against a Radioactive Environment), a “watchdog” organization that monitors activities at the Livermore nuclear weapons lab. Tri-Valley CAREs strengthens global security by preventing the further development of nuclear weapons and working tirelessly for their elimination.

Marylia participated in **the Non-Proliferation Treaty Review Conference at the UN** this spring, and will provide an update and some next steps. Additionally, she will report back from **Washington, DC** about the nuclear weapons budget and explain what's going on at Livermore Lab. Marylia will outline in layman's terms the nuclear weapons programs currently underway, the innumerable ways in which they impact us all.

Following her presentation will be a lively discussion about the costs of 70 years of nuclear development - to our health, environment, ethics, democracy, budget, peace and confidence in human survival. And, we will explore actions to create positive change. Be there!

For more info please contact **408-297-2299**, or check on-line at [sanjosepeace.org/calendar](http://sanjosepeace.org/calendar).

**Marylia Kelley** brings over 32 years of research, writing and facilitating public participation in decisions regarding the Livermore Lab, nuclear weapons, waste and cleanup. As a longtime resident of Livermore, she is personally aware of and has been personally impacted by the radioactive pollution associated with past and present nuclear weapons development. She provides a passionate, well-reasoned, and effective challenge to the nuclear arm of the military-industrial complex in our time.

Marylia has served on the Livermore Lab Community Work Group for more than 25 years, advising the government and the community on the Lab's Superfund cleanup of toxic and radioactive pollution. She has testified on issues concerning the nuclear weapons complex before the House Armed Services Committee, the California Legislature and the National Academy of Sciences. Her determination to keep her community and the world safe from nuclear weapons has shone through time and again throughout her career.
